PERSONAL SUMMARY

Analytical Data Scientist with 3+ years' experience applying machine learning, statistical analysis, and data engineering to public sector planning, healthcare, computer vision, and customer behavior. Skilled in Python, SQL, pandas, scikit-learn, TensorFlow/Keras, and data visualization (Matplotlib, Seaborn, Tableau). Delivered projects in urban development, public health and safety, and insurance. Expert in transforming raw data into actionable insights through preprocessing, modeling, and scientific reporting. Committed to using data to enhance public decision-making and improve social and health outcomes.

SKILLS

- **Programming Languages:** Python, SQL, JavaScript, HTML, CSS
- **Data Analysis & Engineering:** pandas, NumPy, data cleaning, feature engineering
- **Machine Learning & Deep Learning:** scikit-learn, TensorFlow/Keras, CNNs for image classification
- **Data Visualization:** Matplotlib, Seaborn, Tableau
- **Databases & Querying:** Relational databases (PostgreSQL, MySQL), SQL querying, working with relational accident datasets
- **Big Data & Tools:** Familiarity with data pipeline concepts, handling large datasets
- **Cloud & Deployment:** AWS basics (Lambda, S3), model deployment principles
- **Statistical Analysis:** Hypothesis testing, regression analysis, clustering
- **Project Management & Reporting:** Scientific report writing, data storytelling, Agile methodologies

EXPERIENCE

Data Scientist | CaseFile & Co (Legal Tech) | Remote | Jan 2023 – Dec 2024

- Built data pipelines to collect and analyze large volumes of legal case information, improving case management and research processes.
- Applied data consistency techniques to ensure accuracy when multiple users updated case data simultaneously.
- Created interactive dashboards and visualizations to track case progress and key performance indicators for law firm clients.
- Conducted exploratory data analysis on extensive datasets of case records and court rulings to uncover trends and actionable insights.

Data Analyst | Eden Group | Nigeria | Nov 2022 – Nov 2023

- Developed and optimized SQL queries to improve data retrieval efficiency by 90%.

- Created dashboards and interactive reports using tools like Power BI/Tableau to provide actionable insights to stakeholders.
- Automated routine data processing tasks using Python scripts, reducing manual effort and improving accuracy.
- Conducted data quality checks and collaborated with engineering teams to ensure data integrity.
- Provided regular data driven reports to product and marketing teams, enabling data informed strategy adjustments.

PROJECTS

STREAMING SERVICE CUSTOMER BEHAVIOR ANALYSIS (Python, Scikit-learn, Pandas)

- Applied multiple machine learning models including Linear Regression, KNN, Random Forest, and SVM to predict customer monthly spending and churn likelihood from a public streaming dataset.
- Achieved highest spending prediction accuracy with multiple linear regression ($R^2 = 0.8861$) using both numerical and encoded categorical features.
- Demonstrated Random Forest as the top model for churn prediction, outperforming KNN and SVM in key metrics.
- Used k-Means and Hierarchical Clustering to identify two distinct customer segments, validated by Davies-Bouldin and Silhouette scores.

VEHICLE DAMAGE CLASSIFICATION USING CNN (Python, TensorFlow, Keras)

- Developed a CNN model to classify six types of vehicle damage crack, scratch, flat tire, dent, glass shatter, and broken lamp using Kaggle image dataset.
- Designed architecture with convolutional and pooling layers, dense layers with ReLU activation, and a softmax output layer for multi-class classification.
- Applied data augmentation and dropout regularization to improve generalization and reduce overfitting.
- Conducted hyperparameter tuning on learning rate and batch size to optimize performance.
- Achieved 89% overall accuracy and a weighted F1-score of 0.89.

Education and Certifications

JAN 2025 – JAN 2026 Master of Artificial Intelligence and Data Science | Grade(in View) | University of Hull | Hull, United Kingdom

OCT 2018 – AUG 2022 Bachelor of Computer Science | Tansian University | Anambra, Nigeria

Certifications:

- **Complete A.I. & Machine Learning, Data Science Bootcamp**
Udemy | Completed [July, 2025].
